3 Car

0.23 Acre

## PROPERTY DETAILS

Perfectly perched at the back end of a cul de sac, this home boasts open space on two sides and stunning views. A large deck connects the kitchen and family room, perfect for outdoor living. The original owners have meticulously maintained this home. You will love the soaring ceiling entry way and abundant natural light from numerous windows. Upgrade options on the main floor also include a 5th bedroom or office, oversized laundry room, and 8-foot doors. The master retreat features a bonus room with a Juliet balcony, a gas fireplace, and a private deck, making this rare Bradstreet model a true gem. All window coverings and shutters are included. The 3 car garage faces South so you benefit from more snow melt which equals less shoveling! Don't forget the 2300 sq ft of unfinished area in the walk-out basement offering endless possibilities. Work from home?, home theater?, multi generational living?, or even an awesome game room? You get to decide!
