PROPERTY DETAILS

A rare Highlands offering steps from LoHi's celebrated dining and social scene, this architecturally reimagined residence delivers exceptional design, privacy, and individuality with NO HOA. Though part of a quadplex, it lives as a true standalone experience, defined by bespoke finishes and thoughtful craftsmanship throughout.

An artisan-crafted pivot door opens to a striking interior where a sculptural staircase sets the tone. Light-filled living spaces feature curated materials, seamless indoor-outdoor flow to a private teak terrace, and a gourmet kitchen appointed with Sub-Zero, Wolf, and Cove appliances, custom cabinetry, and a quartzite waterfall island.

The upper level reveals a serene primary retreat with a spa-caliber bath, while a rooftop deck captures sweeping city views. A fully finished garden-level residence offers flexibility for guests or income potential. A statement home where every finish is hand selected, this design forward home is refined, modern, and distinctly set apart in one of Denver's most coveted, energetic and walkable neighborhoods.
