PRICE $369,900

This Aurora Home Comes With a Garage Gear-Heads Will Love

Single Family | 960 SQFT | 3 Beds | 1 Baths | 2 Car | 0.15 Acre

PROPERTY DETAILS

Gear-heads, tinkerers, and side-hustle owners, take note. This freshly updated 3-bedroom, 1-bath home in Aurora offers something rare at this price point: a detached 2-car garage pre-wired for EV charging, two separate driveways, and dedicated RV parking, all on a fully fenced, xeriscaped lot. Inside, the work is already done — fresh interior and exterior paint, new carpet throughout, and an updated electrical system. A tile kitchen, engineered hardwood living room, and included appliances (gas range, dishwasher, refrigerator) round out a move-in-ready interior.

Location works just as hard as the garage does: quick access to I-70 puts Denver International Airport and a mountain getaway both within easy reach, while nearby shopping centers, restaurants, and Aurora's medical campuses keep everyday errands close to home. Whether it's a project car, a weekend workshop, or an RV that finally has somewhere to park, 1902 Kenton St was built around that kind of flexibility. Priced at $369,900.
